OBJECTIVE

Looking for a challenging role in a reputable organization to utilize my technical, database, and management skills for the growth of the organization as well as to enhance my knowledge about new and emerging trends in the IT and managing sector.

Lots of people have big ideas. Execution is what matters, and I do execution.

PERSONAL SKILLS AND TECHNICAL SKILLS

Python developer with a background in business development and project management. Passionate about using code to maximize efficiency while developing creative, customer-focused solutions. I worked in the field of packaging structural design in the Amman Chamber of Industry/ACI.

Languages: Bash, PowerShell, HTML, CSS, JavaScript, Python, and SQL.

Skills and Tools: Node.js, React, React Native, Next.js, Git, GitHub, VS Code, Visual Studio, Django, Heroku, Jupyter, Kaggle, Anaconda, miniconda3, Vercel, Netlify, Bootstrap, PostgreSQL

PROJECTS

- Math Kit

a GUI desktop app, that is made specifically for performing basic and advanced mathematical operations (as will be mentioned below) without any additional hassle as it ensures that it serves the main purpose of providing a top-tier mathematical help with not much spent effort by the user.

- **Hacker-News-Project**

This program helps us find the top high-rated articles from the first two pages of the Hacker News site, particularly those that have been voted on more than 100 times by the community.

Link to the project: (<https://github.com/sarahhudaib/Hacker-News-Project>)

- **Django-URL-Shortner**

A service that takes a long URL and turns it into a compact one.

Link to the project: (<https://github.com/sarahhudaib/Django-URL-Shortner>)

- **Amman-Bus-TMS / Transportation Management System**

Amman Bus Management System is a Full-Stack web application built with Python - Django for the backend, JavaScript - React JS for the frontend, and Tailwind CSS for the styling.

Through this web application, the users would be able to keep track of various things regarding the buses' schedule and booking trips, and much more considering that the user is authenticated as either a driver or a passenger. But if the user is not registered or signed in they'll still be able to view the buses' stations, routes, and prices.
